- and more!

With digiWEST Web Builder you can offer your clients and team members a powerful, userfriendly one-stop-shop for all of your project planning and coordination needs.

The Web Builder is an easy-to-use web layout and design tool for project communication and management. With no web building experience whatsoever, you can build a professional website that will allow you to:

- Quickly respond to client requests and inquiries
- Post newsletters and meeting announcements
- House all project documents in one easy, accessible place
- Offer onsite FTP services to your clients and internal team members
- Track documents and maintain version control
- Create online surveys and forums for stakeholders
- Track project tasks and phases, key dates, and activities

Prices start at \$25.00 per month!

Email or call our solutions team for a no-obligation demonstration:
